after writing the data into csv file now we extract the text written by the

user by the below code

```
library('plyr')
```

```
tweets.text=lapply(tweet,function(t)t$text)
```

```
> tweets.text=lapply(tweet,function(t)t$text())
```

cleaning the text

hello.text<- iconv(hello.text, 'UTF-8', 'ASCII') this is used for removing the emoji
else tolower function cannot be used

```
> tweets.text=lapply(tweet,function(t)t$text())
> hello.text<- iconv(tweet.text, 'UTF-8', 'ASCII')
> asciemoji<- iconv(tweet.text, 'UTF-8', 'ASCII')
>
>
>
```

`gsub()` function replaces all matches of a string, if the parameter is a string vector, returns a string vector of the same length and with the same attributes (after possible coercion to character). Elements of string vectors which are not substituted will be returned unchanged (including any declared encoding).

```
gsub(pattern, replacement, x, ignore.case = FALSE, perl = FALSE,  
      fixed = FALSE, useBytes = FALSE)
```

- pattern: string to be matched
- replacement: string for replacement
- x: string or string vector
- ignore.case: if TRUE, ignore case

...

```
> x <- "R Tutorial"  
> gsub("ut", "ot", x)  
[1] "R Totorial"
```

Case insensitive replace:

```
> gsub("tut", "ot", x, ignore.case=T)  
[1] "R otorial"
```

```
#convert all text to lower case  
tweets.text <- tolower(tweets.text)
```

```
>
>
>
> tweet.text=lapply(tweet,function(t)t$getText())
> hello.text<- iconv(tweet.text, 'UTF-8', 'ASCII')
> asciemojii<- iconv(tweet.text, 'UTF-8', 'ASCII')
>
>
>
>
>
> tweettolower <- tolower(asciemojii)
> |
```

Replace blank space ("rt")

```
tweets.text <- gsub("rt", "", tweets.text)
```

Replace @UserName

```
tweets.text <- gsub("@\\w+", "", tweets.text)
```

Remove punctuation

```
tweets.text <- gsub("[[:punct:]]", "", tweets.text)
```

Remove links

```
tweets.text <- gsub("http\\w+", "", tweets.text)
```

Remove tabs

```
tweets.text <- gsub("[ \\t]{2,}", "", tweets.text)
```

Remove blank spaces at the beginning

```
tweets.text <- gsub("^ ", "", tweets.text)
```

Remove blank spaces at the end

```
tweets.text <- gsub(" $", "", tweets.text)
```
